# EMR is becoming THE standard.

## Stop chasing paper. Focus on patient care.

Our team is experienced with Interface integrations between EMR systems and billing and scheduling software. This gives you training, support and a guiding hand to obtain detailed reporting information and accurate, up-to-date analyses of the financial and utilization aspects existent at your facility.

We give you strategies for scheduling, verifications, billing, coding and collection. In addition, we provide material management processes, compliance, staffing levels and vender and payor contracts.

We are able to oversee and assist interfacing your facility with practices, hospitals and other healthcare organizations.

With a integrated EMR system in place, patient information will be readily available to physicians and facility staff, when it is needed.

The future is paperless and massives changes are coming for the healthcare industry.

HDA Enterprises, Inc. can aid your facility on the journey. Our trained staff can facilitate the successful integration of Paperless Electronic Medical Record Systems.

## Don't be overwhelmed.

### System Implementation Costs

include:

- Infrastructure
- Hardware and Software
- Consulting
- Training
- Tech Support

Compare the expected costs for paper records and storage vs. the costs to convert to an EMR system that is paperless. Most facilities recoup their initial investment in less than five years.

## The choice is simple.
